

ORECCA workshop

Wednesday 16 March

11.00 - 12.30

Room 1101A, Brussels Expo

Event overview

A common approach for the exploitation of wind, wave, tidal and other ocean energy resources has the potential to accelerate the development of offshore renewables and reduce their cost. The Offshore Renewable Energy Conversion Platforms – Coordination Action (www.ORECCA.eu) aims to overcome knowledge fragmentation in Europe, with a focus on platform designs and technologies including supply chain issues. This workshop seeks to establish a common offshore renewables roadmap for Europe. Key experts are invited to provide useful input to industry, research organisations and policy makers on the necessary steps to foster the development of the offshore renewables sector in a sustainable and environmentally friendly way.

Programme

11:00 – 11:10 Introduction to ORECCA
Jochen Bard, Fraunhofer IWES

11:10 – 11:25 Offshore renewable resources in Europe
Laura Serri, RSE

11:25 – 11:40 Platform technologies for offshore renewable energy conversion
Diego Vannucci, RINA

11:40 – 12:00 European support actions
Thierry D'Estaintôt, European Commission

12:00 – 12:15 European Roadmap for Offshore Renewable Energy Conversion Platforms
Henry Jeffrey, Edinburgh University

12:15 – 12:30 Discussion, Feedback and further communication
