

# Research and Project Manager

**Company:** WavEC Offshore Renewables

**Location:** Lisbon, Portugal (Hybrid work regime)

**Experience Level:** Engineering degree with a minimum of 3 years' experience preferably in the field of marine renewable energies.

**Start date:** As soon as possible.

**Employment Type:** Full time

**Deadline for applications:** 05/02/2024

## **About WavEC Offshore Renewables:**

WavEC Offshore Renewables is a private non-profit organization, with a strong R&D background, dedicated to unlocking energy transition through the development of engineering solutions and consultancy services to the marine renewable energy sector, particularly, floating wind. Founded in 2003, WavEC has cemented its position as a leading international authority on the topic, supporting the full lifecycle of marine renewable energy technologies, from the conceptual design and tank-testing to the licensing, permitting, construction, deployment, and operation. You can find more information about us on our [website](#), [LinkedIn](#), [X](#), [Facebook](#), and [Youtube](#) channels.

## **Role Description**

We are seeking a dynamic and motivated individual to join our team as a Research and Project Manager for Offshore Renewables. The successful candidate will lead in-depth research initiatives and manage research and consultancy projects. Your role will involve staying informed and up-to-date about the latest changes, advancements, trends, and news in the offshore renewable energy industry. Additionally, you will contribute to the development of cutting-edge solutions in the renewable energy sector.

## **Responsibilities:**

- Conduct in-depth research on regulatory and policy developments, technology advancements, cost dynamics, and energy market and supply chain trends for offshore renewables.
- Analyse and synthesize complex information for policymakers and the wide public.

- Prepare high-quality technical reports and presentations for external audiences.
- Initiate and take the lead responsibility for planning and executing industry/public workshops.
- Perform overall project management, ensuring adherence to budget and work program timelines.
- Participate in the development of proposals for R&D projects.
- Support the vision and mission of WavEC.

**Required Qualifications and Skills:**

- Engineering degree with a minimum of 3 years' experience preferably in the field of marine renewable energies.
- Experience in conducting research and managing projects.
- Ability to lead workshops and engage with diverse stakeholders.
- Proficiency in English, both spoken and written.
- Strong analytical and problem-solving skills.
- Excellent communication and interpersonal skills.
- Familiarity with Python is recommended but not mandatory.

**We offer:**

- Integration into a leading, multi-disciplinary research excellence team.
- Participation in benchmark projects at the international level.
- Work-life balance measures.

**Application:**

Candidates should submit their applications by email to [rh@wavec.org](mailto:rh@wavec.org), including their CV and a short introduction letter as attachments. Emails should be addressed to Ana Brito e Melo and include "Research and Project Manager" in the subject line. Please note that LinkedIn applications will not be carefully monitored and may be lost.
